Profile

Management Information Systems undergraduate at President University (GPA 3.92/4.00) with experience developing data-driven applications and business systems. Built machine learning-powered analytics solutions (Python, XGBoost, PyTorch), full-stack ERP systems (Django, Laravel), and an accessibility-first product platform (Next.js, TypeScript). Google Student Ambassador 2026. Experienced in leading cross-functional teams and managing large-scale events. Seeking internship in Data Analytics, Business Analysis, System Analysis, or Product Management to apply technical and analytical skills in a product-driven environment.

Education Level

Universitas Presiden - Jababeka Education Park, Cikarang Utara, Bekasi Regency, West Java Aug 2024 - Present
Bachelor of Management Information Systems (MIS), 3.92/4.00

Projects

Store Analytics Dashboard with GenAI Mar 2026 - May 2026
Python · Flask · PostgreSQL · PyTorch · XGBoost · ARIMA · LSTM · Groq LLM · Plotly

- Built ML-powered analytics platform integrating 6 forecasting models (ARIMA, LSTM, XGBoost, Random Forest, Transformer, Ensemble) with automated leaderboard — XGBoost achieving lowest RMSE among all tested models on DVD rental dataset
- Integrated Groq LLM chatbot enabling non-technical users to query complex business analytics in natural language, reducing time-to-insight without SQL knowledge
- Visualized KPIs, revenue trends, and customer behavior through interactive Plotly dashboards

GitHub: github.com/guzelaz23/StoreAnalyticsDashboardGenAI

ZAP Express – Logistic Inventory System Aug 2025 - Oct 2025
Laravel · Filament · PostgreSQL · PHP · Chart.js · Tailwind CSS

- Built and validated with simulated logistics dataset covering 500+ SKUs across 9 branch scenarios
- Developed executive dashboards and inventory analytics to monitor stock performance, turnover rates, and operational health in real time
- Implemented automated reporting and alert mechanisms to support data-driven inventory planning and decision-making.
- Defined business rules for inventory health status (Excellent/Good/Warning/Critical) based on availability rate thresholds

GitHub: github.com/guzelaz23/LogisticsInventorySystem

Logistics ERP System Apr 2026 - May 2026
Django · PostgreSQL · Python

- Developed a full-stack logistics ERP application supporting shipment management, inventory tracking, and financial operations.
- Generated multiple financial reports, including Income Statement, Balance Sheet, Cash Flow Statement, Trial Balance, and Accounts Receivable Aging.
- Designed role-based access control and deployed the application for evaluation and testing.
- Documented system requirements and designed data flow for 5 financial report types across shipment, inventory, and accounting modules.

GitHub: github.com/guzelaz23/LogisticsERPSystem

AKSES - Inclusive Digital Learning Platform Mar 2026 - Present
Next.js 14 · TypeScript · Tailwind CSS · Zustand · Web Speech API

- Designed for Indonesia's 22M+ population with disabilities, translating accessibility requirements into 15+ functional specifications across student and teacher portals
- Designed an analytics dashboard enabling educators to monitor accessibility feature adoption and support data-driven student interventions.

GitHub: github.com/guzelaz23/AKSES

Work Experiences

Google - Indonesia Apr 2026 - Present
Google Student Ambassador 2026

- Created educational content on Google products to drive awareness and adoption among university students through social media
- Planned and facilitated on-campus information sessions for Google programs, coordinating logistics and managing communication between Google program requirements and campus audience needs

President University Student Board - Cikarang Aug 2025 - Dec 2025
Vice Project Manager – Student Awarding Night

- Coordinated 70+ committee members across 10 divisions for a flagship university event, mapping task dependencies and managing

cross-functional communication to ensure on-schedule delivery

- Identified and escalated operational risks during planning phase, resolving 3 critical logistical constraints before execution day

President University Student Board - Cikarang

Dec 2024 - Apr 2025

Project Manager – Grant of Hopes Event

- Structured cross-functional workflows and stakeholder roles across 9 divisions for a 300+ person event, coordinating 50+ committee members from planning through execution with zero critical operational failures.

MKU Bureau President University - Cikarang

Oct 2024 - May 2025

Content Designer & Exhibition Operations Intern

- Coordinated end-to-end exhibition operations, stakeholder communication, and visitor management for university events with 2,000+ daily attendees, ensuring seamless execution and participant engagement.

Skills

Programming Python · SQL · TypeScript · Java · PHP · HTML/CSS · JavaScript

Data & ML PostgreSQL · XGBoost · PyTorch · Scikit-learn · ARIMA · LSTM · Plotly · Data Analysis · Data Visualization

Frameworks Django · Flask · Laravel · Next.js · Tailwind CSS · Android Studio · Firebase

Tools Jira · Git · GitHub · Figma · Canva · Microsoft Office

Soft Skills Stakeholder Management · Leadership · Public Speaking · Critical Thinking · Problem-Solving
